

## Quickly create an entry into a plastic dust barrier wherever you need it

Durable self-adhesive zippers attach to plastic sheeting and create an entry in seconds. Two zippers can create a hands-free door. The 7 foot long 3 inch wide heavy-duty zipper withstands high traffic. Specially designed ZipperKnife™ double-cuts the plastic to prevent jams. Flap hooks hold the entryway open for easy access.

*BEST VALUE* Save over 15% compared to six 2-Packs. The 12-Pack includes twelve heavy-duty zippers, twelve flap hooks, and one ZipperKnife™. Packed in a convenient re-closable box. *Save over 15% with the 12-Pack compared to buying six 2-Packs.*

ZipWall® heavy-duty zippers are the quickest way to create an entry in a plastic dust barrier wherever you need it.

Patented ZipperKnife™ sheeting cutter PREVENTS JAMS. Specially designed to double-cut the plastic, the ZipperKnife™ leaves a clean cut that keeps plastic away from zipper teeth. Each ZipperKnife™ will make up to 100 cuts.

Two ZipWall® heavy-duty zippers create a hands-free entry – simply roll up the flap and hold the door open using two flap hooks. This hands-free door can be as wide as needed to get equipment and supplies in and out of the worksite.

Effective at temperatures as low as 32 degrees F. *Tip: To improve the zippers' adherence to a plastic barrier when working in cold temperatures, we recommend attaching them to the plastic ahead of time at a temperature of 50 degrees F or higher.*

A single zipper may be used to create a fly-door.

**Contents:** Twelve zippers, twelve flap hooks, and one ZipperKnife™ sheeting cutter.
