

Quickly cover a doorway to provide an airtight seal with this plastic zippered door. The door, made of 4 mil flame retardant plastic sheeting, attaches to the doorframe with a special double-sided tape that protects the frame surface. Preinstalled heavy-duty zippers provide easy entry and exit. Flap hooks hold the door open for easy access.

The ZipDoor® kit includes one zippered door, one roll of tape, and two flap hooks. It fits a commercial door up to 4.5' x 8'. A [smaller standard size kit](#) is also available.

When you just need to seal off a doorway, the ZipDoor® Kit is the ideal solution. Use it to section off part of a property during remodeling, restoration, or any other messy project. The ZipDoor® Kit is easy to set up and includes everything you need. The door is made of 4 mil flame retardant plastic sheeting and comes with preinstalled heavy-duty zippers that provide access to the work area. The special two-sided tape has a strong adhesive on one side for securing the door panel and a gentle adhesive on the other side for protecting the doorframe. Flap hooks are also included in the kit for holding the door open when needed.

**ZipDoor® Commercial Door Kit** is flame retardant and fits a commercial door. The zippered door panel is 5' x 8.5'. The standard door is not flame retardant.
